

Design and Development Services

High-Tech Electronic Solutions Limited (**HTES**) is a Scottish based electronic design and system integrating company. We specialise in the areas of security and industrial automation sectors.

Our objectives are:

- To assist clients in the development of their products and services
- To provide a customised solutions
- To provide cost-effective market based solutions

Our Mission

HTES provides complete custom, turnkey, and third party solutions. If you have an idea or product that needs to be implemented in hardware or software,

HTES can help with all your development needs, in the shortest possible time.

We deliver fully implemented, fully tested and completely documented solutions.

HTES will work closely with your development team to develop and implement the proper technology for your future products. Such technologies allow you to maximize performance, lowering BOM cost while keeping product's flexibility, maintainability, and extensibility. **HTES** bring up to date technologies to your doorstep. We are committed to build our business around meeting our customer's requirements for pricing, availability, quality and support.

Capabilities

- Embedded Systems Design
- PC-Based Measurement and Control
- Schematic and PCB Design
- Prototype Fabrication
- Web Applications
- Software Development
- Virtual Instrumentation Design
- System Integration
- Networking
- System Testing
- Formal Specification and Documentation Generation

How can we help?

- **HTES** Ltd is a total solution provider. We provide software and hardware development, integration, testing, and contract engineering services for small to mid-sized projects..
- **HTES** Ltd. is able to provide a wide range of solutions for scientific and engineering applications
- We turn your idea into a reality. **HTES** Ltd handles the hardware design, software development, and creation of a prototype, writing documentation and managing development through the full life cycle of your project.
