Market Manager (MM)

Market Manager (MM) is a well-organized software tool for the management of **wholesale, trade and retail businesses**. **Market Manager** is a rapid point of sale suitable for the marketplace environment as well as a back office management system.

The system is designed to be suitable for the use with different types of products.

System information is easily viewed and edited at any time and reports produced on different activities.

The system provides facilities to perform an Electronic Point of Sale (EPOS) functions in addition to the back office requirements.

A multi-user level password at different access level is used to achieve an ultimate data security. System information can be stored and retrieved in seconds. If the identified customer is regular, then the system remembers the details of his/her regular order items. The final configuration of the system can be customized according to user requirements.
