Security Solutions

Security is one of the most important issues in these days. In practice one security system might not be enough to provide the security to one application. Thanks to the new advanced technologies in computer networking, sensors, digital video, communication, and electronic tagging make it possible to implement all these technologies into one solution. The main objective of **HTES LTD** is to provide integrated security solutions to both home and business. Our activities cover different engineering tasks. Such as: design, installation, commissioning, testing, maintenance and training. We provide leading edge technology solutions that are cost effective to our clients. We utilise "off the shelf" hardware wherever possible, integrated with highly robust software. Our customers benefit from our experience in providing customised solutions. All of our software is provided open-source. This allows our customer unfettered

access to use and modify the system as desired. We help our clients to implement up to date technologies in a flexible, reliable and modular backbone structure that suit the harshest environment found in this industry. Our activities cover the following areas:

1. Automatic vehicle identification equipment and number plate recognition systems.
2. Unauthorised intruders alarm
3. Remote video monitoring and recording
4. Assets tracking and management
5. People and vehicles tracking, using a combination of RFID electronic tagging and GPS technologies
6. Fleet management systems
7. Night vision monitoring
8. Expert software packages for risk analysis.

HTES Ltd bring up to date technologies to your doorstep. We are committed to build our business around meeting our customer's requirements for pricing, availability, quality and support.

If you desire results that will make a difference to your company's performance, then give us a call now. We'll be pleased to discuss how we can work together to achieve your goals and objectives. In order to propose a suitable solution for your assets, we need to put together the strategies and security scenarios that suit your application and environment. Evaluating risks sources and building a knowledge engineering to help in configuring the most effective security solution. Our aim is always to give both security personnel and employees a piece of mind.
